

DA VINCI

From the Vitruvian Man to the Mona Lisa, Leonardo da Vinci called on advanced mathematics to create masterful works of art. This same principle is at the core of Da Vinci™ — a magnificent sphere of light formed by hundreds of crystal octagons coming together in stunning simplicity.

Desde el Hombre de Vitruvio a la Mona Lisa, Leonardo da Vinci recurrió a las matemáticas avanzadas para crear obras maestras de arte. Este mismo principio aparece en el núcleo de Da Vinci™: una magnífica esfera de luz formada por cientos de octágonos de cristal unidos con una sencillez impactante.

De l'Homme de Vitruve à Mona Lisa, Leonard de Vinci s'est servi des mathématiques avancées pour créer de magistrales oeuvres d'art. Ce même principe est au coeur de Da Vinci™ — une somptueuse sphère de lumière formée de centaines d'octogones en cristal s'unissant dans une superbe simplicité.

Vom Vitruvianischen Menschen zur Mona Lisa – Leonardo da Vinci bediente sich der Gesetze höherer Mathematik um Meisterwerke der Kunst zu schaffen. Das gleiche Prinzip liegt Da Vinci™ zugrunde: Hunderte Achtecke aus Kristall formen in effektvoller Einfachheit eine magische Kugel aus Licht.

Dall'Uomo Vitruviano alla Gioconda, Leonardo da Vinci si è servito delle sue avanzate conoscenze matematiche per creare degli straordinari capolavori. È questo stesso principio che è al centro di Da Vinci™: una magnifica sfera di luce formata da centinaia di ottagoni di cristallo che si uniscono in una splendida semplicità.

При создании своих уникальных шедевров, от «Витрувианского человека» до «Мона Лизы», Леонардо да Винчи полагался на сложные математические формулы. Тот же принцип положен и в основу Da Vinci™ – величественного светящегося шара, головокружительно простого, составленного из сотен восьмигранных кристаллов.
